DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Amendment, filed 12/27/05, with respect to the rejection(s) of claim(s) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 9, 13, 16, 25 and 27 are rejected under 35 U.S.C. 101 because the claimed invention is not supported by either asserted utility or a well established utility.

Claim 25 is directed to controlling weather filed related to a weather situation.

Claim 27 is directed to endless repeated spectra of sferics.

4. Claims 9, 13, 16, 25 and 27 are also rejected under 35 U.S.C. 112, first paragraph. Specifically, since the claimed invention is not supported by either asserted utility or a well established utility for the reasons set forth above, one skilled in the art clearly would not know how to use the claimed invention.
